

I have been a subscriber to Radio XM for almost 3 years now. I pay for this service and in return I receive their broadcasts. Many of their channels carry no advertising as the stations originate with XM. Other stations are rebroadcasts from elsewhere.

Please do not support this petition 04-160 from NAB. What justification could it have. XM offers a unique service in providing traffic and weather for the various cities. I have used this service many times. I pay for it with my subscription. Service at this depth cannot be had from any local station. Please allow XM to continue offering this service.

Thank you.
